This practice test is designed to introduce your student to the mechanics of taking the TerraNova Grade 10 test when ordered through FLO, and to give your student an idea of the kinds of questions the test will contain. The practice test can be given a day or two in advance of the actual testing. It is not timed.

Answer Sheet for Student

The answer sheet is where your student will mark an answer for each question. Use a #2 pencil. The bubbles on the answer sheet should be filled in completely. Place the answer sheet alongside the Practice Test and remind the student to mark only on the answer sheet.

Practice Test for Student

The TerraNova Grade 10 Practice Test includes questions for Reading and Language Arts, Mathematics, Science, Social Studies, Vocabulary, Language Mechanics, Spelling, and Mathematics Computation. Print and staple these pages together. Place alongside the answer sheet opposite of the student's dominant writing hand when taking the practice test.

Answer Key

When finished, compare the student's answers with the answer key and go over questions that were marked wrong. Ask the student if they feel comfortable with the test taking process. If more practice is needed (for example, the student keeps marking the answers on the practice test and not the answer sheet), print out the practice test and answer sheet pages again and retake.

TEST TAKING TIPS FOR THE STUDENT

- 1. Relax. It's natural to get nervous about tests. Just do your best and try not to worry. You got this!
- 2. Listen and read carefully. Listen carefully when directions are being read to you. Read all the directions carefully on the test. Ask your proctor to explain any directions you don't understand.
- 3. Plan your time. While this practice test is not timed, the actual test is. Listen to the amount of time given for a test section and use that time well. Answer the questions you are sure of first, and be careful to not take too long on any one question.
- 4. Think. It's okay to not know an answer to a question right away. Take some time to think. Rule out answer choices that you know are wrong and choose from the ones that are left.
- 5. Stay positive. Some questions will be hard to answer and others will be easy. Just do your best!

Reading and Language Arts

Read the following excerpt. Then do Numbers 1 through 3.

Best known as the creator of *The Twilight Zone* series, Rod Serling was instrumental in paving the way for future generations of television executives. As a writer and producer, he openly challenged the accepted way of doing business in the television industry at that time. Serling was convinced that those in power had an obligation to use the medium for more than mere entertainment. He believed moral messages and lessons could – and should – be presented in a way that allowed ordinary citizens to relate to the principle involved.

Episodes from his Emmy-winning series are still shown in syndication almost half a century after first hitting the airways. Aside from those who enjoyed the program in the 1960's, the generation that followed continues to be enthralled and excited by one man's innovative thinking.
